HigherSelf Living™
The Living water collection ™
A Limited Edition Functional Sculpture Crafted from Reclaimed Timber and Living Water, Purified Drinking Water
A masterpiece where art, architecture , and living water become one.
At the heart of every HigherSelf Living Water flows a continuous stream of purified drinking water. Unlike decorative water features, this living river is designed to be experienced. Water circulates through a concealed multi-stage filtration system before flowing gracefully through a handcrafted copper channel and returning to a natural ceramic vessel, creating an elegant centerpiece for tea ceremonies, fine dining, and. and meaningful conversation. Crafted from centuries-old reclaimed wood and inspired by the timeless rituals of Japanese hospitality, the table transforms every gathering into an immersive experience where guests share tea, conversation, and flowing water from a common source.

- EXPERIENCE WATER AS NATURE INTENDED.
